

Mic Check for Windows...

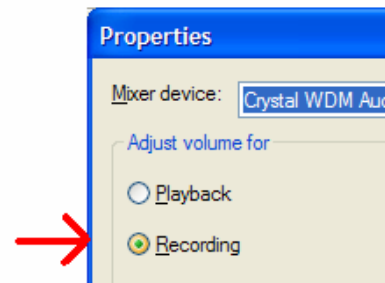

Double click on the Volume Control in the taskbar (lower right side). This will bring up the mixer controls.

Go to “Options” and choose “Properties.”

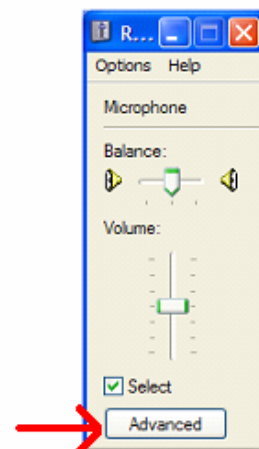

Click the radio button for “Recording” and click OK.

Make sure the “Select” box is checked for microphone and set the volume slider to a reasonable level.

If you do not have the button for “Advanced” as shown at right, go to “Options” and choose “Advanced Controls.”

Click the button for
“Advanced.”

Make sure “Microphone Boost”
is checked and click “Close.”

Click “Close” and exit out of the
mixer.
